It shows also that in order to supply all the new also that in order to supply all the new banks that have prepared to organize, and that are not yet in operation, would require only the addition of less than do both good and evil. And for every act \$5,000,000. In other words, his report shows that after all current demands are tully met he will have at his disposal under the law some \$47,000,000 to supply the new banks. This does not supply the new banks. This does not look like the country was hungering and thirsting for more currency. Here in Wheeling two national banks have voluntarily surrendered their national circulation, and in other cities other banks have the same thing. Why do they person the same thing. satisfactory adjustment of our national figances lies mainly in the well understood antagonism between the debtor and creditor classes. Those who have debts to pay, and they are the majority of people, do not want the wherewithal by he may thus make shrink in value, while his debt remains at \$25 per ton for the ircn. And this is true of any man who has bought anything which is liable to be sold for less than his debt for it. The country is full of people thus unfortunately circumstanced. Mr. Peterson, of your city, will remem-ber an old and dear friend of his father, Captain Duncan, the founder of Massilof gold, and against this there are outstanding about \$382,000,000 of greenbacks, and some \$340,000,000 of national currency that is convertible into greenbacks, saying nothing of about \$47., 000,000 of fractional currency, or a total of nearly \$770,000,000 of paper money. Now whenever the magician's trick of putting a bushel measure into a peck measure, can be really accomplished, then lon, Ohio, and the original developer of brain beyond endurance, affecting neither his health nor spirits, nor arising from conscience, for no purer man lived. If the country wants specie payments at once we have got to come to it by immediately hauling in rope in no stinted quantity—or, in other words, by doing what Secretary McCullough set.

Without food. At 2 o'clock in the morning he started for Cleveland, as well as ever, drove there in a buggy, transacted a large business, was the life of a dinner party, and lett for home that evening. He recovered from these only when age compelled him to give up business. I could cite other instances of the kind. Mr. Beccher's is a case in point. He uses his brain too hard, and it "strikes" back, at times. It gets its rest then apprings forward with more activity than doing what Secretary McCullough set. is confidence, not coin, as if there could without food. At 2 o'clock in the morn-

bosom until it was able to bring in other out to do when he was stopped by Cor-gress, viz, retire greenbacks. Retiring greenbacks at the rate of so many millions they were winding around him, the world would have known nothing of this. If he continues to force the pendulum to one of the screw every month—a fresh depreciation of all values except that of paper money—a painful process that people generally are unwilling to see inaugurated, but which is nevertheless the only logical way to specie resumption.

On the other hand, in opposition not only to this process but to any policy whatever that favors specie payments, wherever that favors specie payments.

Leave the continues to force the pendulum to one side so far, it will swing farther the other way and perhaps end in suicide, and a visit public will call it remorse. But should he go up to his farm, read nothing more learned than "Mother Goose," this winter and do nothing but use his vegetables grown next summer, he will be all right next fall. So much for my analysis. Yours truly, J. E. Wharton.
